Replit-New-Three Sprint Report

Sprint Period: Replit-New-Three

Overview

This sprint focused on significant user interface improvements, enhanced data visualization, and the implementation of a comprehensive notification system. The changes build upon the gl-three foundation, with particular emphasis on mobile responsiveness and user experience enhancements.

Key Changes

Data Visualization & Interaction

- Enhanced Portfolio Charts

    - Added date range selection functionality
    - Improved mobile layout optimization
    - Enhanced date range button styling
    - Removed unnecessary container boxes

- Account Management

    - Added account history viewing capability
    - Implemented history editing functionality
    - Improved data presentation

Notification System

- Comprehensive Notification Implementation

    - Added notification system to header
    - Implemented read/unread tracking
    - Added smooth animations
    - Created milestone and goal progress notifications
    - Implemented swipe-to-dismiss functionality
    - Enhanced notification styling

        - Updated background colors
        - Improved icon consistency
        - Standardized visual appearance

    - Optimized notification badge positioning

Navigation & Layout

- Mobile Navigation Improvements

    - Refactored navigation structure
    - Updated navigation labels
    - Improved icon sizes and alignment
    - Fixed layout inconsistencies

- Added consistent scrollbar

- Header Enhancements

  - Relocated user account menu
  - Added notifications section
  - Centered "Milestone" header text
  - Added portfolio screen link
  - Updated to Lucide React icons

User Profile Enhancements

- Profile Features

  - Added profile image functionality
  - Implemented image upload capability
  - Enhanced loading indicators
  - Added demo credentials to login page

Technical Improvements

1. User Interface

   - Enhanced mobile responsiveness
   - Improved navigation structure
   - Better visual consistency
   - Optimized layout components

2. Data Presentation

   - Advanced chart functionality
   - Improved data filtering
   - Enhanced history management
   - Better date handling

3. User Experience

   - Streamlined notifications
   - Enhanced profile management
   - Improved navigation flow
   - Better mobile interaction

Impact Analysis

The changes in this sprint have:

1. Enhanced the overall user experience
2. Improved data visualization capabilities
3. Created a robust notification system
4. Optimized mobile responsiveness

Next Steps

Future sprints should focus on:

- Extended notification features
- Enhanced data visualization options
- Additional mobile optimizations
- Further user profile enhancements

Commit History

176dfd7 **Add date** range selection **to** portfolio charts **and transaction** records
9be9ba2 Improve mobile layout **of** portfolio chart
9b06b49 **Update** active **date** range button styling
3b4ecce **Update** portfolio chart **date** range selection styling
bc8254e **Update** bottom navigation icons **to** use Lucide React
